

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2 May 2008 has been entered.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shima discloses an inkjet recording apparatus and a cap for a recording head where "when the rib 24 deforms by a predetermined amount and the cap section 21 approaches the nozzle-forming surface 6b, as shown in FIG. 4, the stoppers 25 abut the nozzle-forming surface 6b of the recording head 6. Since the stopper 25 is formed larger in thickness than the rib 24, the stopper 25 scarcely deforms in the vertical direction even when abutting the nozzle-forming surface 6b" (Column 6, lines 30-37). However, Shima does not disclose the corners of the rib are made thinner than the other portions of the rib.
